

Welcome to the New Members of the WCRP Steering Groups

12.01.2013

WCRP welcomes the new leaders and members of its International Projects' Scientific Steering Groups, Working Groups and Panels and thanks those who are rotating off.

Thanks to those who offered their experience, time and energy to guide the development of the WCRP scientific strategy and implementation of its activities in the past, present and future. WCRP's successful legacy and contributions depend on the voluntary contributions of many scientists and community leaders and the support of international and national sponsors.
