

Biography

Mia Gross is currently completing her PhD at the Climate Change Research Centre at the University of New South Wales in Sydney, Australia. Her PhD investigates changes in daily temperature variability and extremes for the globe. Most recently, Mia's work has focused on how daily temperature extremes are changing relative to mean temperatures, and what's driving these excesses in extremes in particular regions. Mia completed a Bachelor of Science (Climate Science) at Macquarie University and achieved First Class Honours at UNSW Sydney for her thesis entitled "Projections of health-relevant heatwave indices for New South Wales and the Australian Capital Territory".
